iPad and Seeing Ai

Seeing AI is a free app that narrates the world around you. Designed for the blind and low vision community, this ongoing research project harnesses the power of AI to open up the visual world and describe nearby people, text and objects. Seeing AI demonstrates how technology can make the world more inclusive. Available in the iOS App Store.

The student and his family have tried the OrCam but do not want to spend thousands of dollars, and have heard about Seeing Ai. Use the app on the available iPad, and write your

observations in the study guide. How was it different from your OrCam experience.
